

BNMI 2025

Gothenburg, Sweden, August 19-22, 2025

BNMI 2025 pre-symposium workshops

Train-the-trainer workshop - how to improve your own training

Have you ever experienced that users don't seem to remember much of what you taught them when you trained them? How can we improve the way we train users so that they really learn? Pedagogy is the science of how we learn and how to design effective teaching. Pedagogical tools are simple to apply and have a great potential for improving the learning outcome of microscopy trainings.

During this 2h workshop, we will guide you to improve the design of your own microscopy training, in small steps and at your own pace.

The workshop will run on the 19th of August from 9:00 to 11:00.

Location: Academicum, Medicinaregatan 3, room: Ingegerd Eriksson

Meeting point: Academicum, main entrance Medicinaregatan 3 just before 9:00

Trainers:

Sylvie Le Guyader, Karolinska Institutet, Sweden

Rhonda Reigers Powell, Clemson University, US
